

PhD/ Postdoc/ researcher/ project manager positions in 3DTV and Semantic Video Analysis

Artificial Intelligence and Information Analysis (AIIA) Laboratory at the Department of Informatics of the Aristotle University of Thessaloniki in Greece is seeking candidates to fill a number of vacant research positions:

- 1) **Researchers** holding an MSc degree or Diploma in Electrical Engineering/ Computer Science/ Computer Engineering or equivalent. The applicants are strongly encouraged to work towards a PhD degree, while occupying these positions, if desirable.
- 2) **Postdoctoral researchers**, holding a PhD in Electrical Engineering/ Computer Science/ Electrical Computer Engineering.
- 3) **Technical/ financial project manager**, holding the same degrees as in (1).
- 4) **System administrator**, holding the same degrees as in (1).

The AIIA Lab profile and related information can be found in <http://www.aiia.csd.auth.gr>. The positions are funded by the 3DTVS FP7 project, funded by European Union.

The general research topics are:

- 1) 3DTV video indexing and retrieval
- 2) digital image / video processing and analysis and computer vision

An indicative list of possible research topics is the following:

- 3D image/video analysis
- Digital image/video processing, computer vision

The exact research topic of the new researcher will be chosen so as to match his/her experience aiming at maximum productivity. Appointments can be extended for 3 years or more. Proven research experience in one or more of the following fields: digital image/video processing, computer vision, graphics, interfaces. Very good knowledge of English, C/C++ programming and strong interest in academic research are highly desired. The project manager and the system administrator **should** have technical knowledge of the above mentioned technical fields.

Prospective applicants **should be EU citizens only** and should forward their resume (CV) and recommendation letters by fax or email (preferably) to:
